**WINNIPEG REGIONAL HEALTH AUTHORITY SELECTS
QHR's EMR FOR REGIONAL CLINICS**
QHR strengthens Canadian EMR leadership position

Kelowna, BC, June 22, 2010 – (TSX-V: QHR) QHR Technologies Inc. (“QHR” or the “Company”), a leading Canadian healthcare technology provider, announces that its EMR division (Electronic Medical Records), Optimed Software Corporation (Optimed) has entered into a contract with the Winnipeg Regional Health Authority (WRHA). The initial three year contract calls for WRHA’s use of Optimed’s Accuro® EMR software and related services for up to 315 physicians and 1,400 clinical users within the WRHA’s 30 regionally operated clinics.

“On June 1, 2009, Optimed became the first Approved EMR Vendor to meet all Manitoba e-Health core requirements,” said Fred Chapman, Optimed’s General Manager. “Our agreement with the WRHA will help the region address the needs of all its physicians providing care in the community. Our solution allows physicians increased productivity with respect to dispensing their medical counsel while spending less time on administration – a key consideration.”

Accuro® EMR is an industry leading clinic management software solution for physicians. Its modules manage key functions such as patient scheduling, billing (government, WCB, private and third party), electronic medical records (EMR), letters (including direct faxing), prescriptions, requisitions and other electronic forms, as well as electronic lab and diagnostic imaging results.

“Since becoming the first EMR vendor to meet Manitoba eHealth’s qualifications, QHR has grown its EMR business in Manitoba and has expanded its Winnipeg-based workforce. QHR has now contracted over 700 of Manitoba’s 2,400 physicians. The WRHA agreement, one of the largest of its kind in Canada, makes QHR the leading EMR provider in Manitoba,” said Al Hildebrandt, QHR’s Chief Executive Officer and President. “QHR’s EMS division is already the largest supplier of payroll systems for Manitoba’s healthcare employees, and provides financial systems to the majority of healthcare sites and regions in the province”.

WRHA is one of Canada’s largest regional health authorities, with acute care hospitals, long term care facilities and the 30 regional clinics. The WRHA prides itself on being one of Canada’s most forward thinking health authorities, assisting its providers and staff to deliver world-class healthcare solutions. Currently, the Accuro® EMR solution is implemented at many physicians offices across Manitoba, along with community clinics in the region.

Nationally, QHR’s EMR division has over 3,500 physicians using its products and services, including more than 2,200 on EMR. According to CanadianEMR.ca, Accuro® EMR is the highest ranked national EMR in Canada based on independent physician reviews (see www.CanadianEMR.ca).

About QHR

QHR is a publicly traded Canadian company specializing in software designed to improve the efficiency of professionals in healthcare and other markets. QHR has two distinct business units.

The EMR division (Electronic Medical Records) offers a suite of medical software modules, providing computer-based medical records for family physicians, specialists and surgeons. Electronic medical records are key components of the nationwide move to provide electronic health records for all Canadians. The EMR division also provides on-site and off-site hosting capabilities.

The EMS division (Enterprise Management Software) specializes in workforce management software and consists of integrated payroll, employee self service, staff scheduling and human resource software, and in customized financial management software built on the Microsoft Dynamics GP platform. These products are targeted to complex healthcare and social services environments.

About the Winnipeg Regional Health Authority

More than 28,000 people work in the Winnipeg Regional Health Authority (WRHA). With an annual operating budget of nearly \$1.8 billion dollars, the WRHA operates or funds over 200 health service facilities and programs. The WRHA serves residents of the City of Winnipeg as well as the rural municipalities of East and West St. Paul, with a total population of just over 700,000 people. The WRHA also provides health care support to nearly half a million Manitobans who live beyond these boundaries, as well as residents of northwestern Ontario and Nunavut who require the services and expertise available within the region. The WRHA fulfills its purpose of Caring for Health by working to provide services that promote independence, wellness, treatment and care, and doing so with respect for the patients, residents, clients and communities it serves.
